

LANTERN BUILD SHEET

STUDIO BUILD: STRAPS AND CORDS ONLY

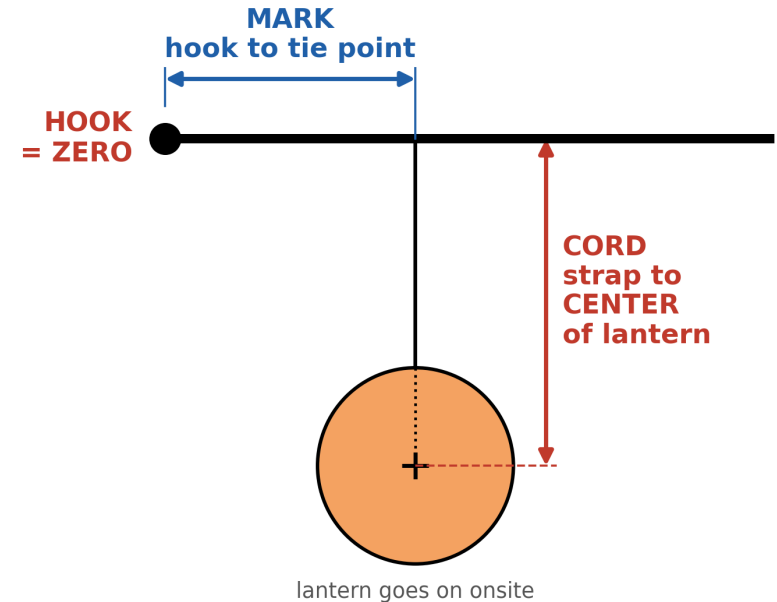

Lanterns stay packed until onsite

7 straps (A to G) | 6 cords on each strap | 42 cords total | one page per strap

READ THIS FIRST

- 1 THE HOOK IS ZERO.** Each strap has one hook. Wrap the hook in hi-vis gaff tape and write the strap letter (A to G) on the tape. Every measurement along the strap starts at the hook.
- 2 MARK = where the cord ties on.** Measure along the strap from the hook.
- 3 CORD = strap to the CENTER of the lantern.** Not the top, not the bottom. This is the finished hanging length, so add your own extra for knots and hardware.
- 4 CHECK EVERY CORD after you tie it on.** Measure from the strap to the point on the cord that will sit at the center of the lantern. Off by more than 1 inch? Fix it.
- 5 TAG EVERY CORD with its ID and lantern size.** Example: A1, 36". The ID is the strap letter plus the position counted from the hook, so A1 is nearest the hook. Lanterns go on onsite straight from these tags.
- 6 BUILD EXACTLY TO THE SHEET.** Spacing and lengths are uneven on purpose and no two straps match. Do not even them out.

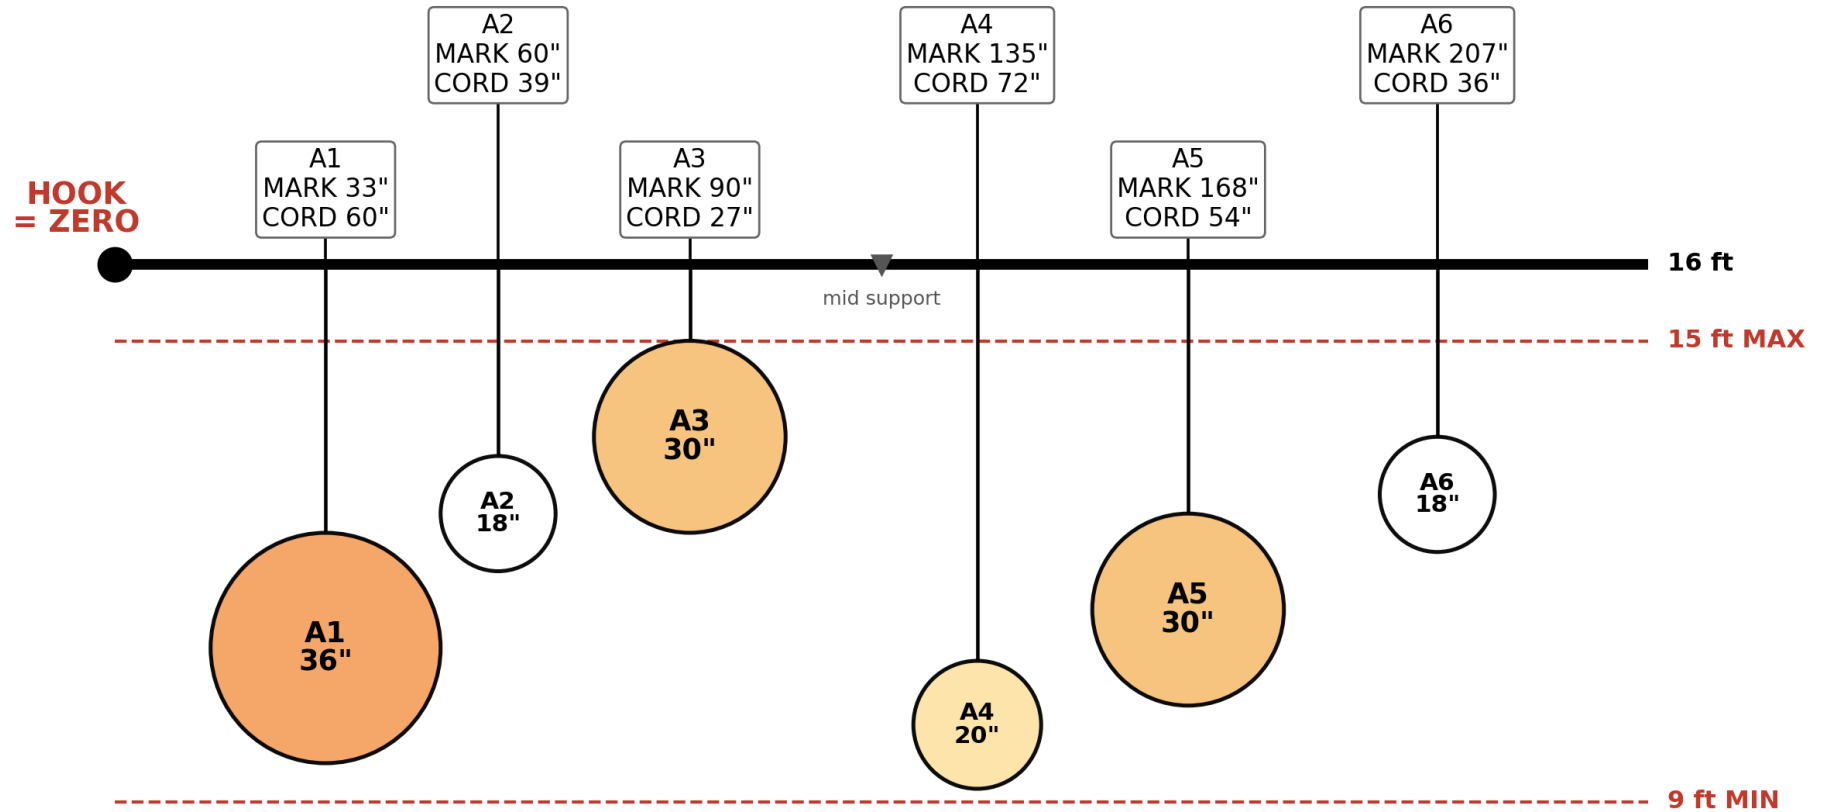

HOW TO MEASURE

WHY IT MATTERS. The straps hang 16 ft up, over a dancefloor. Built to these numbers, no lantern top is above 15 ft, no bottom is below 9 ft, and neighbors clear each other by only a few inches. A cord a few inches wrong makes lanterns touch or hang too low.

VENUE PLAN: WHERE IT HANGS

Reference only.
Venue plan is not to scale

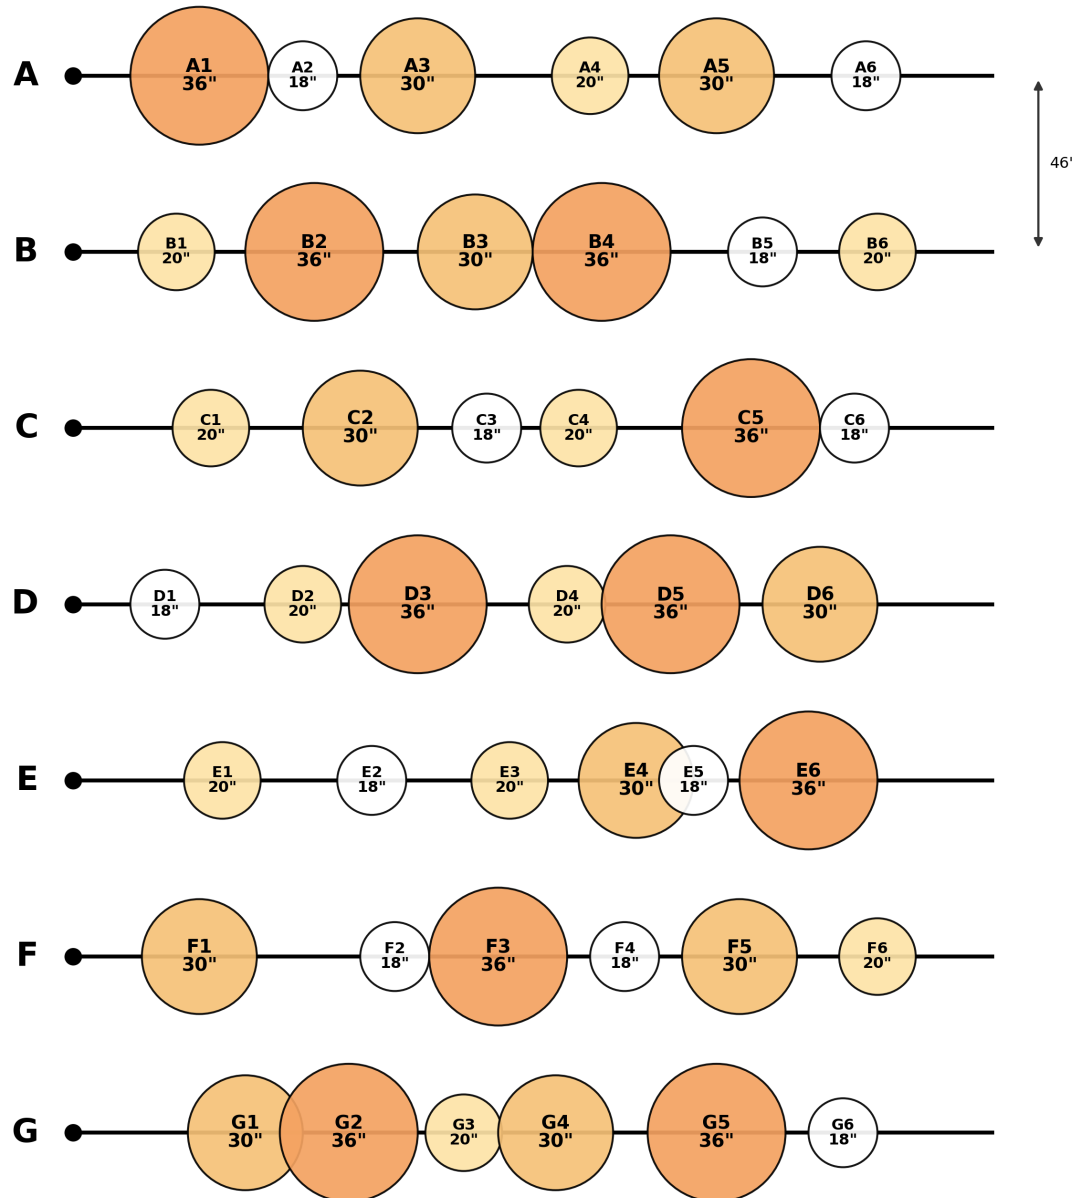

Straps run between the two rows of black dots on the venue plan. Hook ends (hi-vis tape) go on the truss at the top of this plan. Straps hang in order A to G, left to right. The third truss crosses the middle of every strap and supports it. Lanterns are drawn at plan scale to show position only.

READING THIS VIEW

- Each circle is one lantern, drawn to scale, with its ID and size.
- Hooks are all on the left, on the same side of the room.
- Straps hang in order A to G, about 46 inches apart.
- Circles that overlap hang at different heights.

ONSITE

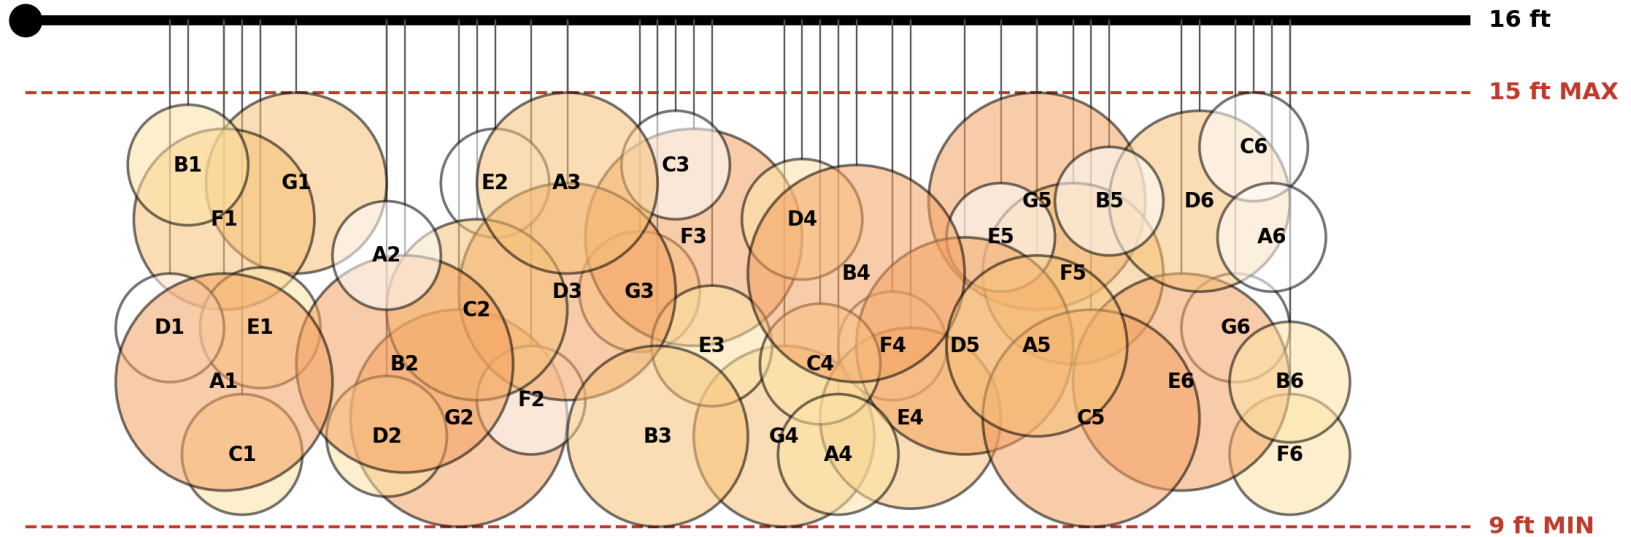

- Hang the lantern size written on each cord tag.
- Never swap sizes between positions. Replace a damaged lantern with a spare of the same size.
- Rip the hi-vis tape off the hooks once everything is installed.
